New aluminum-water rocket propellant promising for future space missions

Nanotechnology Now - 17 октября, 2009 - 00:00

Researchers are developing a new type of rocket propellant made of a frozen mixture of water and "nanoscale aluminum" powder that is more environmentally friendly than conventional propellants and cou...

UA Scientists Discover Quantum Fingerprints of Chaos

Nanotechnology Now - 17 октября, 2009 - 00:00

Poul Jessen and his team in the College of Optical Sciences are the first to produce experimental evidence that classical chaos occurs in the quantum world.

Physicists Measure Elusive Persistent Current That Flows Forever

Nanotechnology Now - 17 октября, 2009 - 00:00

Physicists at Yale University have made the first definitive measurements of "persistent current," a small but perpetual electric current that flows naturally through tiny rings of metal wire even wit...

Growing geodesic carbon nanodomes

Nanotechnology Now - 17 октября, 2009 - 00:00

Tiny carbon islands bubble up at the center to form nanoscopic geodesic domes

Категории: Nano planet

Researchers discover recipe for controlling carbon nanotubes

Nanotechnology Now - 17 октября, 2009 - 00:00

Carbon nanotubes hold promise for delivering medicine directly to a tumor; acting as sensors so keen they detect the arrival or departure of a single electron; replacing costly platinum in fuel cells;...
